

## Technical education in evening schools

By Clarence Hamilton Creasey

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 68 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1905 edition. Excerpt: . . . been drawn up, is comparatively small. Year by year the standard of the Examinations goes up, and in order to keep up the record of examination results, it is found necessary to increase the time devoted to each subject. Moreover, the larger Institutions throw their wellequipped laboratories open to evening students, and this increases the time required in subjects in which practical instruction can be given. Mathematics is frequently taught in two-hour lessons; Machine Drawing and Building Construction often require two hours a night on two nights a week; while Applied Mechanics and Steam, formerly (and still in small towns) taught in one-hour lessons, now occupy two and a half or three hours. The two opposing principles of Catholicity and Specialisation here assert themselves, and not a few of the defects of curricula arise from the difficulty of drawing a line between them. The...
