 *****.Much of the twentieth century saw broad political support
 for public funding of American higher education. Liberals
 supported public investment because it encouraged social
 equity, conservatives because it promoted economic
 development. Recently, however, the politics of higher education
 have become more contentious. Conservatives advocate deep
 cuts in public financing; liberals want to expand enrollment and
 increase diversity. Some public universities have embraced
 privatization, while federal aid for students increasingly
 emphasizes middle-class affordability over universal access. In
 Public Funding of Higher Education, scholars and practitioners
 address the complexities of this new climate and its impact on
 policy and political advocacy at the federal, state, and
 institutional levels. Rethinking traditional rationales for public
 financing, contributors to this volume offer alternatives for
 policymakers, administrators, faculty, students, and researchers
 struggling with this difficult practical dynamic. Contributors: M.
