Createspace Independent Publishing Platform, United States, 2016. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.The Illustrated Science series is intended to open the scene beyond the threshold of so many science taboos. It lets the actual physical evidence speak for itself. Special focus is needed onto the Ice Age Challenge for its existentially critical importance. The series presents 25 years of research, reaching beyond mainstream perceptions. Do you want to know how the Galactic System operates, how stars operate, and what affects their dynamics, even to the point that Ice Ages result on Earth? Here begins a journey of extraordinary discovery, powered by the near-incredible capacity of our humanity to know the truth. With it we can determine the future before it happens and are able to shape it as we wish to experience it, even while the livable zone shrinks under Ice Age condition in the 2050s. The book explores the science of astrophysics and plasma physics and their reflection on the big climate cycles on Earth It focuses on galactic dynamics and solar dynamics. Both are critical for understanding their consequences for human living, especially now that we are near the end of the interglacial warm holiday that is actually a climate anomaly. The climate changes that we experience are but fringe effects towards the phase shift of the Earth getting up to 40 times colder than the Little Ice Age had been. We can prepare ourselves for this climate change. The materials, technologies, and energy resources do exist, to relocate our living into the tropics, relocating Canada, Europe, Russia, and so on. But will we do it? Here the task of unfettered science begins. The illustrated science series is a part of a larger major project...
